

Tanmay Trivedi

FULL-STACK DEVELOPER

PORTFOLIO: [tanmaytrivedi.dev](#)

GITHUB: [github.com/iTanmayTrivedi](#)

LINKEDIN: [linkedin.com/in/itanmaytrivedi](#)

EMAIL ID: tanmay.trivedi.jp@gmail.com

LOCATION: India · Open to Relocation – Japan

PROFILE

Full-stack developer experienced in building SaaS platforms, internal management systems, dashboards, and multilingual web applications using React, Next.js, TypeScript, Node.js, PostgreSQL, AWS, and Docker.

Skilled in RBAC, API integration, authentication systems, deployment workflows, and production-style application architecture. Passionate about building scalable user-focused systems and seeking software engineering opportunities in Japan.

TECHNICAL SKILLS

Frontend	React	Next.js	TypeScript	TailwindCSS	JavaScript (ES6+)
Backend	Node.js	PostgreSQL	Supabase	REST APIs	Express.js
Cloud & DevOps	AWS	Docker	Vercel	GitHub Actions	CI/CD
Other	RBAC	OAuth / JWT Auth	State Management	Responsive Design	i18n

PROJECTS

Internal Company Management System

React · Node.js · PostgreSQL · Docker

- Built a full-stack internal tool supporting employee records, task assignments, and department-level dashboards with multi-role access.
- Implemented RBAC with distinct permission layers for Admin, Manager, and Staff roles, enforced at both API and UI level.
- Containerized the application with Docker; deployed backend services on AWS EC2 with environment-based config management.

Appointment & Reservation System

Next.js · TypeScript · Supabase · Vercel

- Developed a scheduling platform with real-time availability tracking, conflict detection, and automated confirmation workflows.
- Integrated Supabase Auth for user session management; deployed on Vercel with custom domain via DNS configuration on Hostinger.
- Implemented row-level security policies in PostgreSQL to ensure data isolation per tenant/user.

E-commerce Admin Dashboard

React · TypeScript · REST API · TailwindCSS

- Built a responsive admin interface for product management, order tracking, and inventory analytics with live data from REST endpoints.
- Designed reusable component architecture with TypeScript interfaces for type-safe API consumption and state handling.
- Implemented pagination, search filtering, and export functionality to handle large data sets efficiently in-browser.

Multilingual SaaS Platform

Next.js · i18n · Supabase · Vercel

- Architected a SaaS application with full English/Japanese bilingual support using Next.js i18n routing and dynamic locale switching.
- Integrated third-party authentication and Supabase backend with per-user data isolation; configured pre-filled demo credentials for reviewers.
- Deployed across multiple Supabase instances for portable, recruiter-accessible demo environments with persistent auth state.

System Monitoring & Log Dashboard

React · Node.js · PostgreSQL · AWS

- Engineered a real-time dashboard aggregating system health metrics, error logs, and uptime data from multiple backend services.
- Built a Node.js log ingestion pipeline writing structured events to PostgreSQL; rendered time-series visualizations on the frontend.
- Deployed the monitoring stack on AWS; configured alert thresholds with notification triggers for critical system events.

EXPERIENCE

Founder & Full-Stack Developer — Lynt · Open Source & SaaS Development

Apr 2025 – Present · India

- Independently architected and built Lynt, a SaaS product, from initial system design through production deployment on Vercel with custom domain.
- Owned the full development lifecycle: database schema design (PostgreSQL/Supabase), REST API implementation (Node.js), and React frontend.
- Maintained application infrastructure, managed environment configuration, and iterated on features based on user feedback and system performance.

- Applied software engineering best practices including version control workflows (GitHub), component modularity, and type-safe development (TypeScript).

CERTIFICATIONS

Foundational C# with Microsoft

Microsoft / freeCodeCamp

AWS S3 Basics — Cloud Storage Management

Amazon Web Services (AWS)

Azure Cognitive Services — Computer Vision

Microsoft

Model Context Protocol (MCP) Advanced Topics

EDUCATION

Bachelor of Technology — Biotechnology

Rama University, Kanpur

2025 – 2029 (Expected)

LANGUAGES

English · Native / Fluent

Hindi · Native

Japanese (日本語) · Business Conversational

ADDITIONAL INFORMATION

- Open to relocation across Japan
- Interested in SaaS engineering, scalable systems, and multilingual applications
- Active in modern full-stack development using React, Next.js, Node.js, and PostgreSQL
- Seeking junior software engineering opportunities
